HOW THIS WORKS

For the grown-up

Every page looks like one thing - a house, an umbrella, a flower, a tree. It is secretly a picture of something else.

The numbers know the secret. Colour by the numbers and the hidden picture appears.

There is no correct palette: any colour works for any number, as long as different numbers get different colours.

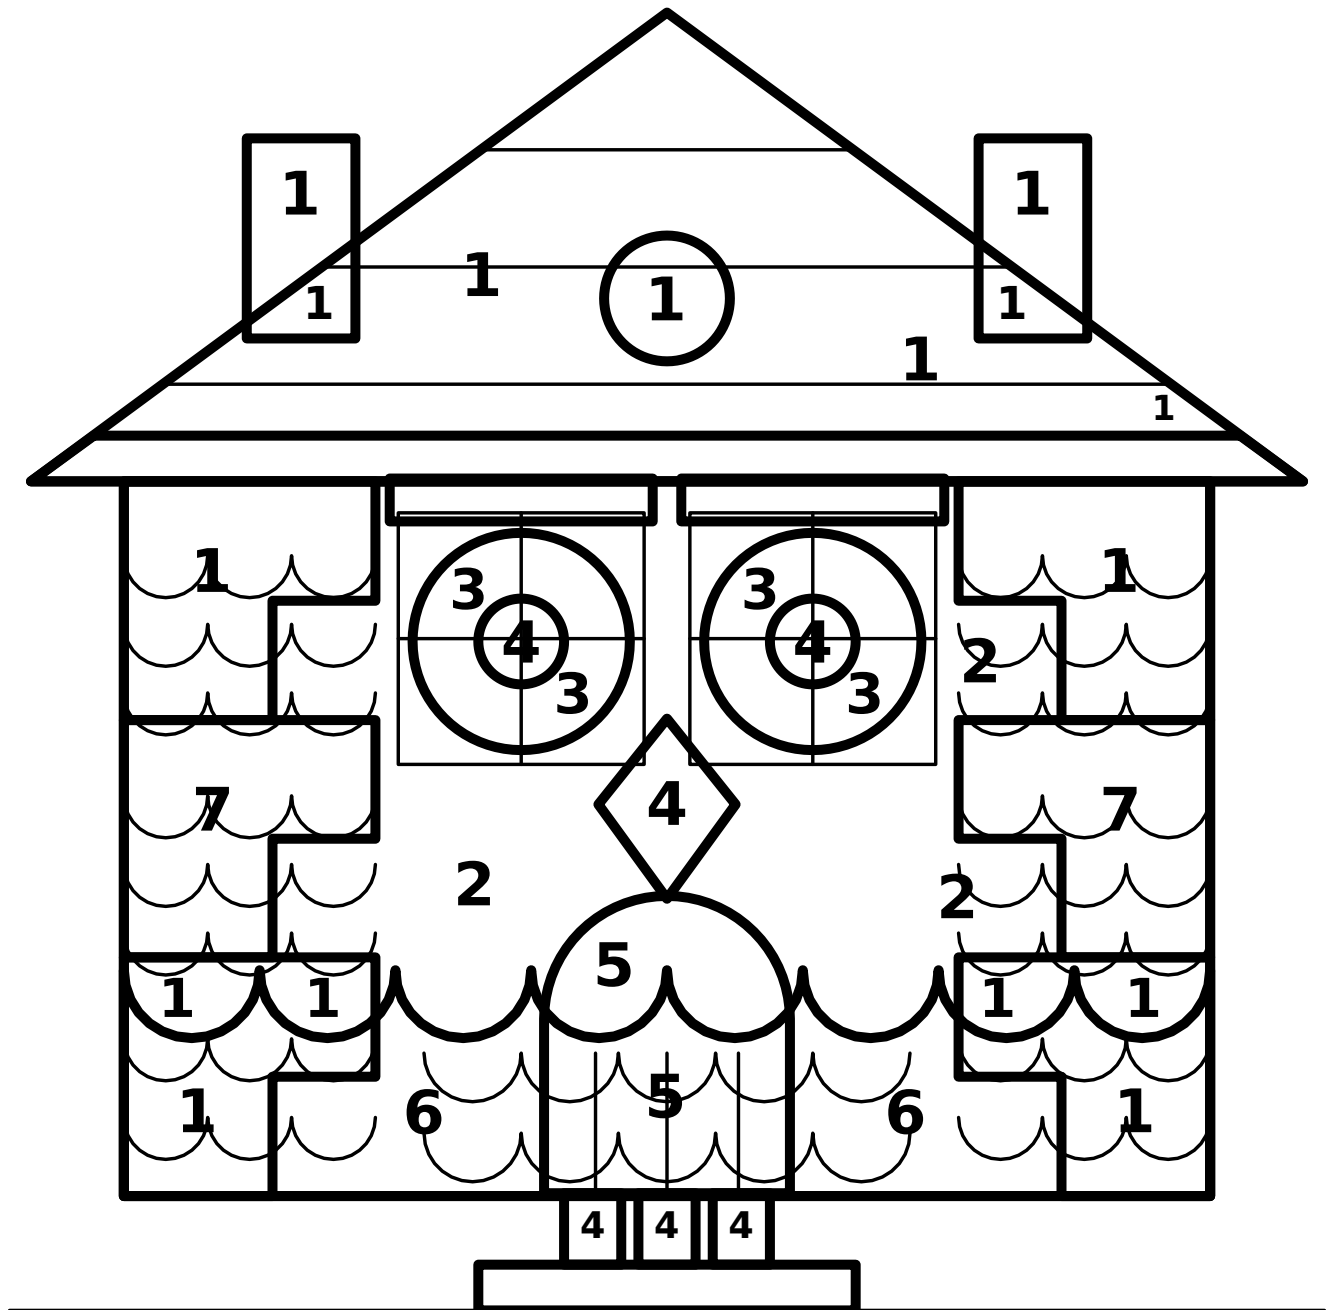

For the kid

1. Pick a colour for each number and fill in the boxes below the picture.
2. Find every 1 and colour it. Then every 2. Keep going.
3. THICK lines are where a colour stops.
4. THIN lines are decoration - colour straight over them like they are not even there. That is the whole trick.
5. When you are done, look again. What is it now?

The lines are not the boss of you.
